

BATHROOM CLADDING

# skin panels

## Decoration and creativity to a further level

Far more than a bathroom cladding option. In addition to their functional role in covering walls or in the simple switch from a bathtub to a shower, Skin Panels offer a creative proposal for design and aesthetic renovation at a further level.

Panels take spaces on a new perspective, combining texture and colour with the existing elements in the bathroom, and increasing the possibilities of each space as far as your imagination will take you.

# material and characteristics

Made of a non-slip, clean and hygienic material based on polyurethane resin, which allows perfect adaptation to the bathroom space and greater resistance and elasticity to impacts and breakage.

**Nanobath technology**  
Prevents the reproduction of bacteria in wet areas.

**Unique texture**  
Texture with slate finish that combines perfectly with our shower trays.

**Made to measure**  
It can be made to measure and adapted to spaces such as columns.

**Colours on demand**  
6 standard colours RAL  
(consultar disponibilidad de RAL personalizado)  
DEKOR designs.

**Panel Silexpol®**  
(mixture of polyurethane resin and other minerals)

- Can be cut to measure.
- Mounted without aluminium profiles or finishing.
- Vertical panels can be cut in width and height.
- The varnishing on the panels is done by hand and there may be subtle differences in tone.
- The panel thickness allows flexibility for adaptation to irregularities in the wall surface.
- 100% waterproof, no membrane required.
- Easy to install using silicone, polyurethane putty or MS.
- Ultraviolet protection (UV).
- Easily repairable.

# texture and colours

**TEXTURE:** Slate finish

MICROCEMENTO

# dimensions

**WIDTH:** From 70 cm. to 120 cm. (consult the possibility of custom-made for special spaces)

**HEIGHT:** 250 cm.

**THICKNESS:** 0,6 cm.

No need of aluminium profiles for installation  
Possibility of vertical and horizontal installation

# easy to install

They are installed on the surface with an MS/Silicone adhesive.

On request, there is an optional "click" system with tongue and groove that facilitates its placement, leaving a minimum line of separation between panels that gives it a unique and continuous aesthetic.

## STANDAR SYSTEM

## "CLIC" OPTIONAL SYSTEM

Sticking and/or sealing of the various elements should be performed using a silicone type sealant.

THIS SYSTEM IS ONLY AVAILABLE ON REQUEST

Approximate measurements, tolerance 5 mm.  
This tolerance may be modified without prior warning.  
Please contact your supplier for any additional queries.
